

AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH

Faculty of Science and Technology

Assignment Title:	Strategic Website Design for Businesses Growth.		
Assignment No:	1	Date of Submission:	28 January 2025
Course Title:	Business Communication		
Course Code:	ENG2103	Section:	C
Semester:	Fall	2024-25	Course Teacher: AKIBUR RAHMAN KHAN

Declaration and Statement of Authorship:

1. I/we hold a copy of this Assignment/Case-Study, which can be produced if the original is lost/damaged.
2. This Assignment/Case-Study is my/our original work and no part of it has been copied from any other student's work or from any other source except where due acknowledgement is made.
3. No part of this Assignment/Case-Study has been written for me/us by any other person except where such collaboration has been authorized by the concerned teacher and is clearly acknowledged in the assignment.
4. I/we have not previously submitted or currently submitting this work for any other course/unit.
5. This work may be reproduced, communicated, compared and archived for the purpose of detecting plagiarism.
6. I/we give permission for a copy of my/our marked work to be retained by the Faculty for review and comparison, including review by external examiners.
7. I/we understand that Plagiarism is the presentation of the work, idea or creation of another person as though it is your own. It is a form of cheating and is a very serious academic offence that may lead to expulsion from the University. Plagiarized material can be drawn from, and presented in, written, graphic and visual form, including electronic data, and oral presentations. Plagiarism occurs when the origin of them arterial used is not appropriately cited.
8. I/we also understand that enabling plagiarism is the act of assisting or allowing another person to plagiarize or to copy my/our work.

* Student(s) must complete all details except the faculty use part.

** Please submit all assignments to your course teacher or the office of the concerned teacher.

Abstract—This report explores the role of strategic website design in driving business growth by enhancing user engagement and improving online presence. The objective was to analyse how design elements like user-friendly interfaces, responsive layouts, and SEO-optimized content contribute to better customer experiences and increased conversions. A survey was conducted to gather insights from users and business owners on the impact of well-designed websites. The findings indicate that incorporating strategic design features significantly boosts customer satisfaction and business performance. Suggested improvements include integrating analytics tools, e-commerce functionality, and mobile optimization to maximize the potential of business websites.

Index Terms— Website design, user experience, SEO, business growth, responsive design.

I. INTRODUCTION

A. Background Information

In today's digital era, having a strong online presence is essential for businesses to grow and thrive. A well-designed website serves as the foundation for this presence, acting as the primary platform for customer engagement, brand representation, and online transactions. Many businesses, especially small and medium enterprises, face challenges in creating effective websites that align with their goals and cater to their target audience. Poor design, lack of responsiveness, and absence of optimization often result in lost opportunities and reduced growth potential. Addressing these issues with strategic website design can significantly enhance customer experience and drive business success.

B. Overview of the Report

This report explores the role of strategic website design in fostering business growth. It highlights the importance of key design elements such as user-friendly interfaces, mobile

responsiveness, SEO optimization, and engaging content. The study also examines the impact of incorporating modern tools like analytics, e-commerce functionality, and interactive features. Suggestions are provided for implementing these strategies to maximize the potential of business websites. By analysing user feedback and business needs, the report aims to demonstrate how effective website design can serve as a catalyst for growth and success in the competitive digital marketplace.

II. METHODOLOGY

A. Description of the Solution

The solution emphasizes designing strategic websites to drive business growth by incorporating user-friendly interfaces, responsive design, and well-structured navigation. The approach includes creating visually appealing layouts, optimizing loading speeds, and integrating features like contact forms, product showcases, and call-to-action buttons to enhance user engagement. Additionally, incorporating basic search engine optimization (SEO) ensures better visibility on search engines, attracting more customers.

To further streamline business operations, e-commerce functionality and analytics tools can be embedded to track user behaviour and improve decision-making. These strategies collectively enable businesses to establish a robust online presence and foster growth effectively.

B. Methods Used

To evaluate the impact of strategic website design on business growth, a questionnaire-based survey was conducted. Using Google Forms, a comprehensive questionnaire containing 20 questions was created to gather insights into participants' experiences with websites of small and medium-sized businesses. The survey aimed to understand user preferences, the importance of user-friendly interfaces, and the role of SEO in improving website visibility and

performance. Responses were collected over a week, from January 1 to January 7, 2025.

C. Selection of Contributors

The survey included 30 participants: small business owners, website developers, and users who frequently interact with business websites. These diverse groups were selected to capture a variety of perspectives on website design and its impact on user experience and business growth. These partners were selected because of their experience with online websites and their understanding of the importance of a good website. Their feedback provides valuable insight into the effectiveness of strategic web design in driving business growth.

III. RESULTS AND DISCUSSION

A. Results

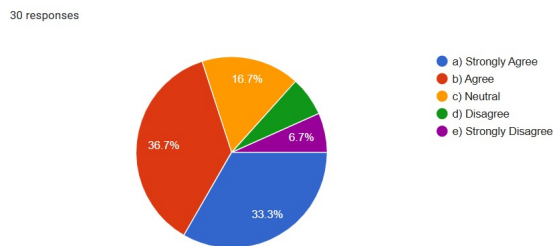

Fig 1. The number of people with order tracking support is highly valued.

The pie chart illustrates respondents' opinions on the value of order tracking support based on 30 responses. The largest portion, 36.7%, agreed that it is highly valued, followed by 33.3% who strongly agreed. Meanwhile, 16.7% were neutral, 6.7% disagreed, and a small 6.7% strongly disagreed. This indicates a generally positive perception of order tracking support.

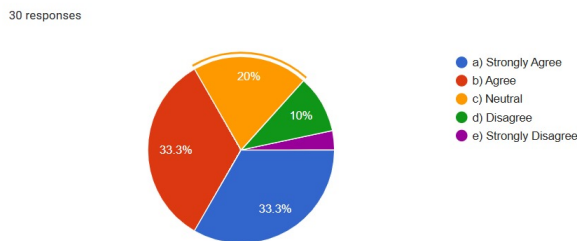

Fig. 2. No. of people with clear refund policies ensure reliability.

The pie chart depicts opinions on the reliability of clear refund policies, based on 30 responses. Equal proportions of 33.3% strongly agreed and agreed with the statement. Meanwhile, 20% remained neutral, 10% disagreed, and a

small 3.3% strongly disagreed. This indicates that most respondents associate clear refund policies with reliability.

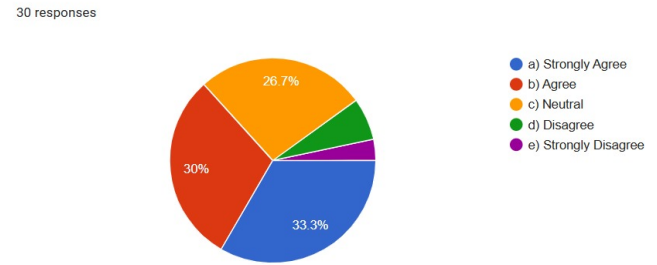

Fig. 3. No of people with Product videos improve the shopping experience.

The pie chart illustrates the responses to the statement "Product videos improve the shopping experience" based on 30 participants. A majority either strongly agreed (33.3%) or agreed (30%), indicating positive sentiment toward the statement. Meanwhile, 26.7% remained neutral, with minimal disagreement. This reflects a generally favourable perception of product videos in enhancing shopping experiences.

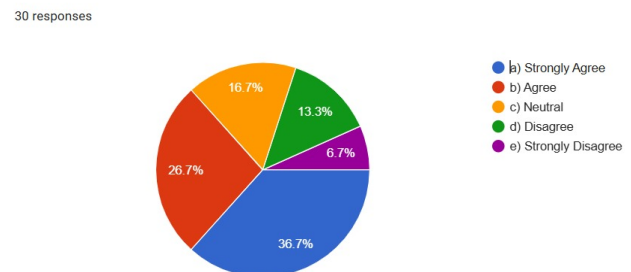

Fig 4. The number of people with Instant payment confirmations enhance user satisfaction.

The pie chart shows responses to "Instant payment confirmations enhance user satisfaction" from 30 participants. Most strongly agreed (36.7%) or agreed (26.7%), while 16.7% were neutral, and few disagreed (13.3%) or strongly disagreed (6.7%). Overall, feedback is largely positive.

Table 1. Customer Support Features

Question Number	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)	Mean
1.	10*5 = 50	11*4 = 44	5*3 = 15	3*2 = 6	1*1 = 1	116/30 = 3.86
2.	10*5 = 50	11*4 = 44	5*3 = 15	2*2 = 4	2*1 = 2	115/30 = 3.83
3.	12*5 = 60	8*4 = 32	7*3 = 21	3*2 = 6	0*1 = 0	119/30 = 3.96
4.	12*5 = 60	7*4 = 28	5*3 = 15	6*2 = 12	0*1 = 0	115/30 = 3.83
5.	10*5 = 50	5*4 = 20	11*3 = 33	2*2 = 4	2*1 = 2	109/30 = 3.63
						19.11/5 = 3.82

Table 2. Security and Trustworthiness

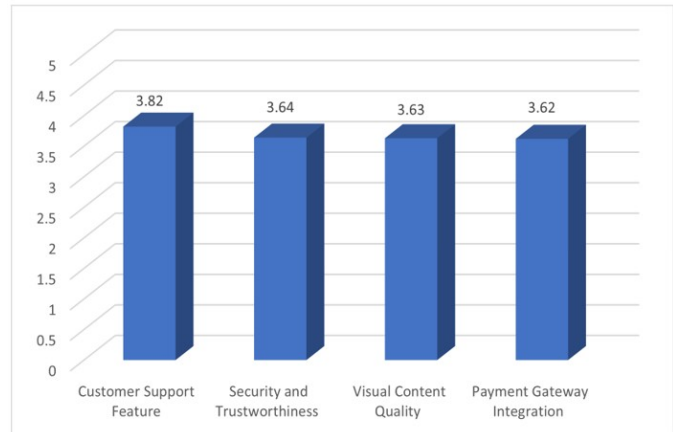

Question Number	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)	Mean
1.	10*5 = 50	8*4 = 32	5*3 = 15	5*2 = 10	2*1 = 2	109/30 = 3.63
2.	10*5 = 50	10*4 = 40	6*3 = 18	3*2 = 6	1*1 = 1	115/30 = 3.83
3.	7*5 = 35	9*4 = 36	7*3 = 21	5*2 = 10	2*1 = 2	104/30 = 3.46
4.	6*5 = 30	11*4 = 44	8*3 = 24	3*2 = 6	2*1 = 2	106/30 = 3.53
5.	8*5 = 40	12*4 = 48	5*3 = 15	3*2 = 6	2*1 = 4	113/30 = 3.76
						18.21/5 = 3.64

Table 3. Visual Content Quality

Question Number	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)	Mean
1.	10*5 = 50	9*4 = 36	8*3 = 24	2*2 = 4	1*1 = 1	115/30 = 3.83
2.	7*5 = 35	14*4 = 56	4*3 = 12	3*2 = 6	2*1 = 2	111/30 = 3.7
3.	7*5 = 35	8*4 = 32	8*3 = 24	5*2 = 10	2*1 = 2	103/30 = 3.43
4.	9*5 = 45	8*4 = 32	8*3 = 24	2*2 = 4	3*1 = 3	108/30 = 3.6
5.	10*5 = 50	6*4 = 24	9*3 = 27	2*2 = 4	3*1 = 3	108/30 = 3.6
						18.16/5 = 3.63

Table 4. Payment Gateway Integration

Question Number	Strongly Agree (5)	Agree (4)	Neutral (3)	Disagree (2)	Strongly Disagree (1)	Mean
1.	9*5 = 45	11*4 = 44	7*3 = 21	2*2 = 4	1*1 = 1	115/30 = 3.83
2.	6*5 = 30	8*4 = 32	9*3 = 27	3*2 = 6	4*1 = 4	99/30 = 3.3
3.	7*5 = 35	12*4 = 48	6*3 = 18	3*2 = 6	2*1 = 2	109/30 = 3.63
4.	9*5 = 45	10*4 = 40	4*3 = 12	5*2 = 10	2*1 = 2	109/30 = 3.63
5.	11*5 = 55	8*4 = 32	5*3 = 15	4*2 = 8	2*1 = 2	112/30 = 3.73
						18.12/5 = 3.62

Bar Graph:

B. Discussion

Analysis of web design strategies shows that it plays a significant role in driving business growth by increasing user satisfaction, trust, and engagement. Key features such as customer support, security, content visibility, and payment integration receive positive feedback, but areas for improvement, especially in terms of security and compliance, are also identified. These findings highlight the importance of improving web design to meet customer needs and facilitate effective operations.

IV. CONCLUSION

Website design strategy plays a significant role in the growth of a business by increasing customer satisfaction, building trust, and encouraging customer engagement. The study found that key factors such as customer support,

security measures, visual content quality, and seamless payment integration provide significant benefits in creating a good customer base. Improvements such as increasing security in location analysis and improving visual aesthetics can improve the work environment. By emphasizing user-friendly design and utilizing technology-enabled solutions, businesses can strengthen their online presence and ensure continuous growth.

A. Limitation

This study was limited by the content of user recommendations and the specific population sample. Future research could explore the impact of new technologies such as AI-driven personalization and augmented reality to strengthen web design strategies.

B. Implications for Business Growth

A well-designed website can support your business growth by keeping customers engaged, building trust, and improving the user experience. First, effective support, solid security, visually appealing content, and seamless checkout can increase customer loyalty and conversion rates.

ACKNOWLEDGMENT

The team would like to extend sincere gratitude to Mr. AKIBUR RAHMAN KHAN, Lecturer, Faculty, Department of English, AIUB, for his invaluable guidance and support throughout the preparation of this report. His expertise and insightful feedback greatly contributed to enhancing the depth and quality of the work. Appreciation is also extended to all survey participants for their valuable time and input, which provided essential data for this research. Their contributions played a pivotal role in the successful completion of the report.
